Design und function

## TECEdrainline

**The ground-level shower channel with design grates and tiled basin**

### Product range

Seven different grate designs and a tileable basin in lengths 700–1500 mm, as angled channels in lengths 900–1500 mm. Drains with especially low height of 95 mm or with especially high drainage capacity of 1.2 l/s.

### Installation

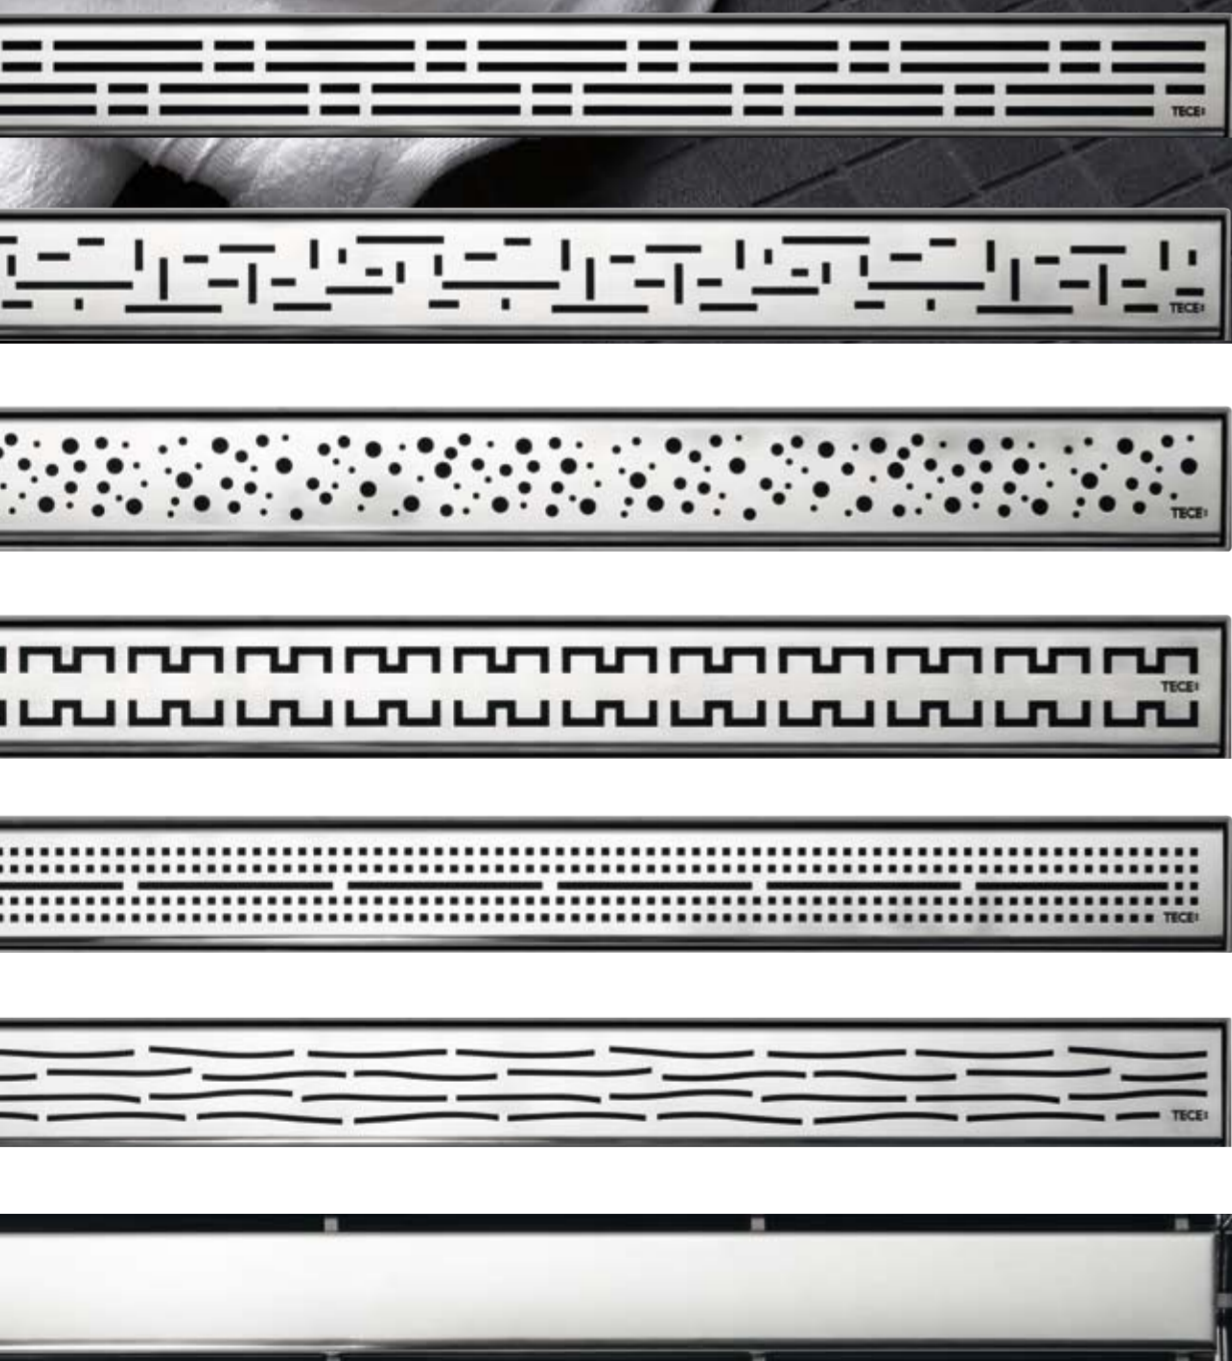

Precise levelling with adjustable feet, installation close to the wall with simple angling of the channel flange. Option of integrating into natural stone floors.

### Sealing

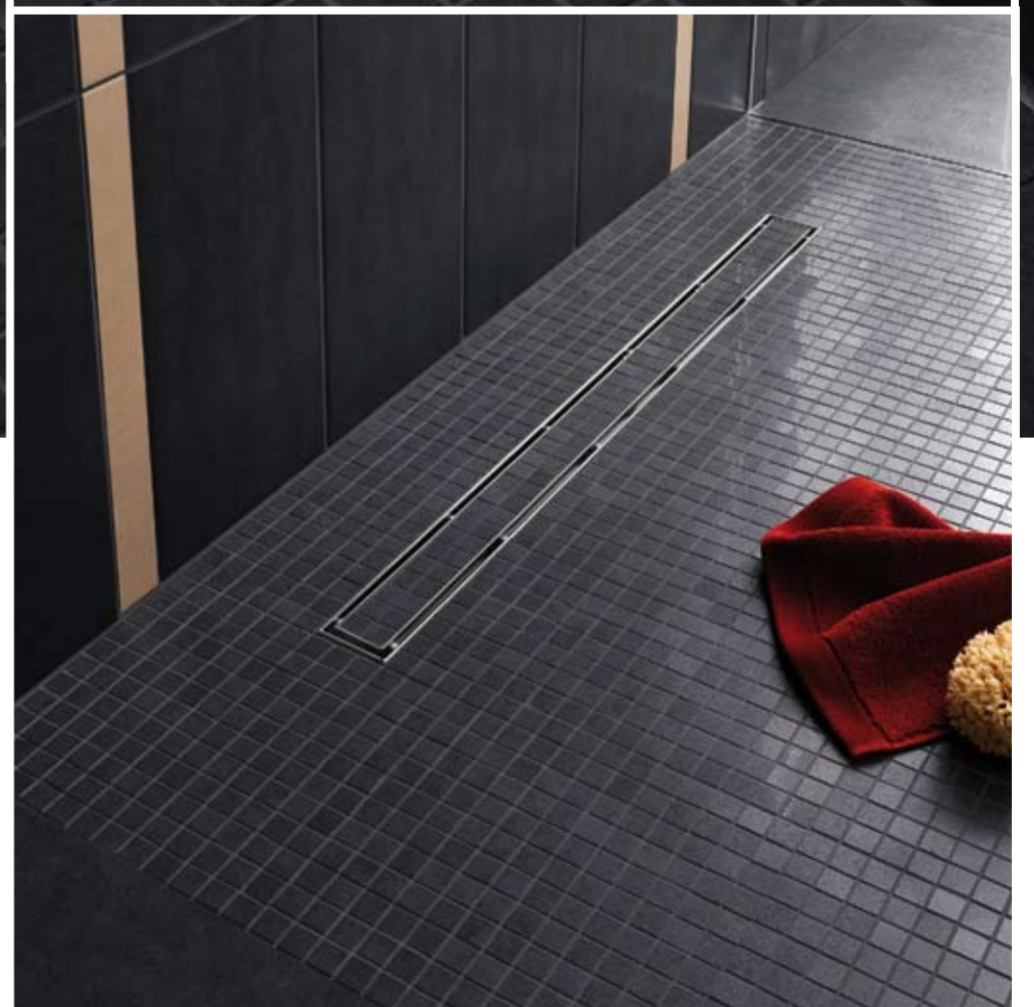

A precisely tailored seal collar made of impermeable fleece is integrated in the insulating coating, thereby offering double security. (in the delivery range included)

### Hygiene

The channel body has no gaps or crevices, is easy to clean and particularly hygienic.

All grate designs are also available as angled channels.
